

THE PURDUE LANDSCAPE REPORT

Welcome to the 2024 Purdue Landscape Report

By: Kyle Daniel, daniel38@purdue.edu

Welcome to the 2024 Purdue Landscape Report! We'll be sending out the newsletter every other week throughout the growing season. New in 2024 we'll be featuring bi-weekly articles from the [Indiana State Climate Office](#). As we all know, the 'new normal' for weather is now 'abnormal'. The State Climate Office will be providing a recap and upcoming outlook for weather, which will allow you to more effectively plan for pesticide applications, schedule irrigation, predict pest emergence, and provide your clients with more efficient plant health care. You can access their website [here](#) for more in-depth climate information.

As a reminder, there are several tools that you can access from the Purdue Landscape Report.

These include:

[The Purdue Plant Doctor](#)-A free, in-depth resource that includes help in diagnosing plant problems and recommends treatment options.

[The Purdue Plant and Pest Diagnostic Laboratory](#)-A fee-based service that helps in ID, pest diagnosis, and recommendations for mitigating problems.

[Purdue Landscape Report Resources](#)-External resources that will help in plant health care.

[Purdue Landscape Report Search](#)-Easily access information from past PLR articles.

[Purdue Landscape Report Past Issues](#)-All of the past newsletters distributed to the subscribers.

Enjoy the 2024 season of the Purdue Landscape Report! If you have any questions, please don't hesitate to reach out.
